

Dear Sen. Tester,

As I'm sure you have seen by now, Planned Parenthood, the nation's largest abortion giant, has been caught on film haggling over the price of the body parts of aborted babies and casually discussing where to "crush" so that certain organs remain intact so they can fill their baby body parts order for the day.

I hope you find these practices as horrific and unacceptable as I do.

Planned Parenthood receives over \$500 million a year from taxpayers. It's time to end that funding, and it's time to end it now.

Also, all politicians and elected officials and candidates running for office should refuse monies from Planned Parenthood. If they have taken money from them in the past, that money should be returned. If politicians, elected officials, and candidates for office do not return Planned Parenthood's donations and publicly call for the defunding of Planned Parenthood, they are complicit in the abortion organization's practices.

In Planned Parenthood's world, babies are worth more dead than alive. The humanity of the child is disregarded in the name of profit. The abortion giant also perpetuates a view that somehow they care about women and about providing quality healthcare. When any healthcare provider intentionally deceives patients into believing that their preborn babies will not be chopped up and sold piece by piece, they betray those women, those mothers who were taken advantage of for profit.

Any politician who supports Planned Parenthood supports this deranged view of preborn babies and the calculated business model that puts a price tag on every woman that walks into their doors.

Please vote to defund Planned Parenthood immediately, and if you have received donations from Planned Parenthood, they should be returned immediately.

Sincerely,

[name]
