

AGENDA 2030's Effect on Missouri

LEARN ABOUT SUSTAINABLE DEVELOPMENT AND AGENDA 2030, how it has been implemented in Missouri and your county and what steps you can take to stop it.

“Agenda 21 is a comprehensive plan of action to be taken globally, nationally and locally by organizations of the United Nations System, Governments, and Major Groups in every area in which human impacts on the environment.” - UN Website

Agenda 2030, once called Agenda 21, is encroaching on personal property, redefining living space, disintegrating national sovereignty, mandating radical global environmentalism, and more. We can no longer stand by and do nothing.

IT IS TIME FOR US TO JOIN TOGETHER AND PUSH BACK.

We are excited to have Amy Fox as our speaker. Mrs. Fox is CWA of Missouri's Issues Specialist specializing in Agenda 2030 and private property rights. She became involved after reading her son's high school science textbook. Realizing that a grand scheme of transformation was occurring in the name of "sustainable development", Fox quickly educated herself about the agenda. This agenda includes measures that restrain the individual in exchange for the good of the collective. Such measures include regulation, fees and land-use restrictions. She has been involved at local and regional level, like the Missouri's Ozark National Scenic Riverway to prevent loss of local control.

Fox works with office holders, local leaders and city governments to bring awareness so that local citizens can push back against sustainable development and big government.

Freedom or Sustainable Development? American or Global Citizen? It's time for choosing.
