

↓ If You Are Pro-Life, Memorize These 10 Simple Facts

Use this information as a guide when talking to uncertain or pro-choice friends curious about why you are pro-life *and* to motivate the passively pro-life towards further action.

1. The Unborn is Human: The child's size, level of development, environment, or degree of dependency can't change their fundamental being. Infants are also small, undeveloped, and just as dependent on their mothers.

2. The Baby's Heartbeat: The child's heart beats at 21 days. It is audible at 8-10 weeks gestation.

3. Fetal Development: Almost 54% of abortions occur from 7-12 weeks when a baby already has a developing nose, mouth, ears, intestines, brain waves, touch response, hiccups, and more.
