Only half of the Christians in the United States are registered to vote and only half of these actually vote. We are letting others decide our nation's future for us.

It is time for us to **unite, mobilize and make an impact** by motivating conservatives to register and vote. You have an **opportunity** through the work of Concerned Women for America to be part of the process of **turning the tide** in this country through **one** election. **Are you with us!?**

- Penny Nance, CEO and President of Concerned Women for America

Sign up today! There is a place for you in this exciting project. As a team we will initiate a state wide get out the vote effort with voter registration drives, phone banking, social media, literature distribution, events, election day turnout assistance and more. We will equip and train you.

Women, men and the whole family are welcome!
