# The Real Alfred Kinsey that *Kinsey* Doesn't Show

Liam Neeson's portrayal in *Kinsey* reveals some of Alfred Kinsey's deviant behavior, yet the film suppresses the most shocking truth about this homosexual, sadomasochist, voyeuristic pedophile advocate, whose "research" launched the sexual revolution.

Kinsey's agenda was to create a "sexual utopia" where everyone could have sex with anyone and anything without restraint.

***Warning: The information inside is not suitable for children.***

# A closer look at Kinsey's research reveals that:

- He compiled statistics of “normal” sexual behavior by including a high percentage of pedophiles, inmates, sex offenders, pimps and prostitutes and described them as “average” Americans. He kept no records that could corroborate his findings.
- The Kinsey data are the scientific basis for the Model Penal Code, which led to the elimination or reduction in penalties for sex offenses, including rape, child abuse and prostitution.
- Kinsey's data are also the basis for most of America's sex education curricula, which begin with the premise that children are “sexual beings” entitled to sex at all ages.
- He believed that all sexual behaviors were “natural,” including bestiality, pedophilia, homosexuality, sodomy and sadistic sex. He argued that sex and morality had no connection.
- He collected data on the sexual abuse of hundreds of infants and children with the purpose of recording “orgasms.”
- He believed there was nothing inherently wrong with child-adult sex except for reactions to it based on superstitious “taboos.”
- Kinsey filmed his wife masturbating and having sex with other staff members and he himself had sex with all of his male staff.
- He filmed himself masturbating and performing masochistic acts on himself. Biographers report that he may have fatally injured himself during a bizarre masturbation incident.
