

The Honorable
United States Senate
Washington, D.C. 20515

Dear Senator,

On behalf of the 500,000 members of Concerned Women for America Legislative Action Committee (CWALAC) nationwide, I would like to support and thank Senator Grassley for introducing two amendments to S. 1410, Smarter Sentencing Act of 2013, that will enhance criminal enforcement of sexual crimes.

We must continue to promote legislation that will protect vulnerable girls and women from domestic violence and sexual abuse and provide justice by requiring prosecution of the perpetrators. Both these amendments seek to do just that, by strengthening the existing U.S. Code on sexual abuse and domestic violence.

The amendments will implement commonsense punishments for these illicit crimes by holding perpetrators accountable to the law and sentencing them according to their actions. By seeking to ensure stricter punishments towards these crimes, legislators will be voting to hold violators accountable based on the specific crimes they commit. Both amendments are tools given to the judicial system to ensure that justice will be served and criminals will be prosecuted to the fullest extent of the law.

Again, I commend Senator Grassley for introducing these amendments and respectfully urge your support.

Sincerely,

Penny Young Nance
Chief Executive Officer and President
Concerned Women for America Legislative Action Committee
