

SUBJECT: Stop Funding Abortion Travel

To whom it may concern,

Because Target has decided to weigh into the political debate, siding with abortion advocates instead of women and their unborn children, I am writing to inform you that I will be taking my business elsewhere.

If Target is offering money to pay for the termination of unborn children, what benefits are you providing to women who choose to have their children? Your discriminatory policy is anti-woman and anti-family while pushing the narrative that a mother is not capable of raising her child and being successful in the workplace. I suggest you put that funding towards programs that help both the woman and the child like donating to crisis pregnancy centers and adoption agencies.

Until you halt funding for abortion services, I will no longer be shopping at your stores and will encourage others to do the same.
